--Detailed Description of the Preferred Embodiment--

Page 9, line 11, after "accompanying drawings.", start a new page, and insert the following paragraph:

--ABSTRACT OF THE DISCLOSURE

A control device or "bird" for controlling the position of a marine seismic streamer is provided with an elongate, partly flexible body which is designed to be electrically and mechanically connected in series with a streamer. In its preferred form, the bird has two opposed wings which are independently controllable in order to control the streamer's lateral position as well as its depth.--
